May 11, 2012

The opening session will begin at 1pm ET. Please connect to the event between 12:45 and 1pm ET through the following link:

<http://mediasite.yorkcast.com/webcast/Viewer/?peid=cf61b0f52e37434294f90496a7cbb7af1d>

Pre-event Testing

Prior to the webcast, we strongly recommend that you confirm that your computer and Internet firewall support viewing this type of Webcast. You may test your system by viewing an archived webcast at the link below. Confirm that you can hear audio, see video, and view the slide presentation displayed adjacent to the video player.

Click the link below to test:

<http://mediasite.yorkcast.com/webcast/Viewer/?peid=ef1135ec9e8846ddbcfaf3471eb713ec>

Windows Requirements: For best results, it is recommended that Windows users have Microsoft Windows 2003, XP, Vista or 2008, and use Internet Explorer version 7.0 or later, Firefox 2.0 or later, or Google Chrome 1.0 or later. Your Windows computer comes with Windows Media Player

pre-installed, and you should confirm that your version is 9.0 or later. If you're using Microsoft's Silverlight Players, version 3.0 or later is preferred. You may download the most current versions of Internet Explorer, Windows Media Player and Silverlight Player for free at www.microsoft.com

Internet Requirements: Webcasts will look and sound best when viewed over a broadband Internet connection of 300kbps or greater sustained bandwidth. You can confirm your available bandwidth by running the bandwidth test available at www.speedtest.net.

Firewall Requirements: Some corporate network administrators block streaming media at the network firewall. If you are unable to view streaming video, you may need to notify your network/IT administrator that you wish to participate in a webcast. Please advise them that the following firewall ports need to be opened in support of proper webcast viewing: TCP/80, TCP/1755, UDP/1755, TCP/554, and UDP/554.

Getting Help: To avoid problems viewing the webcast, we strongly recommend testing prior to the webcast using the test link and information provided above. Should you encounter problems during testing that you suspect are not caused by software or network configuration issues at your location, you may contact webcast technical support via e-mail to events@yorktel.com

Thank you for your participation in the 2012 Virtual Financial Management Institute.
